

## ABSTRACT OF THE DISCLOSURE

[0053] A liner for a cargo area of a vehicle, such as a car, truck, trailer, or the like, includes at least three layers, a base layer, an intermediate patterned layer, and a clear or transparent top layer so that the patterned layer may be viewed. The patterned layer may be monochromatic, where only a single color is used, or it may be polychromatic, where several colors are used. The patterned layer may be a color scape, a design or logo, a message, or any decorative item, etc. Three embodiments of methods for making a liner are disclosed. The methods include the use of a female mold, a male mold, or a combination of male and female molds where the male mold is a ram applying pressure and heat to the several layers on the female mold.
